

CLASS 8

CALLS

Box the Gnat:

Take right hands with the person you're facing. You're going to trade place passing right shoulders. The joined hands are lifted and the girl goes under the raised hands as she turns toward her left. You end facing each other, still holding right hands and facing the opposite wall from the start of the call.

Extend:

Step forward. If someone is in front of you and facing you, finish by stepping to a wave. Normally you'll want to step to a right-handed wave. If you begin in a left-handed wave, step forward to a left-handed wave.

Zoom:

From Tandem Couples with Leaders in front and Trailers behind, the Leaders peel to the outside away from each other, walk a little arc and end up in the Trailers' position. In the meantime, the Trailers just step forward into the positions the Leaders have vacated. The two couples have switched positions.

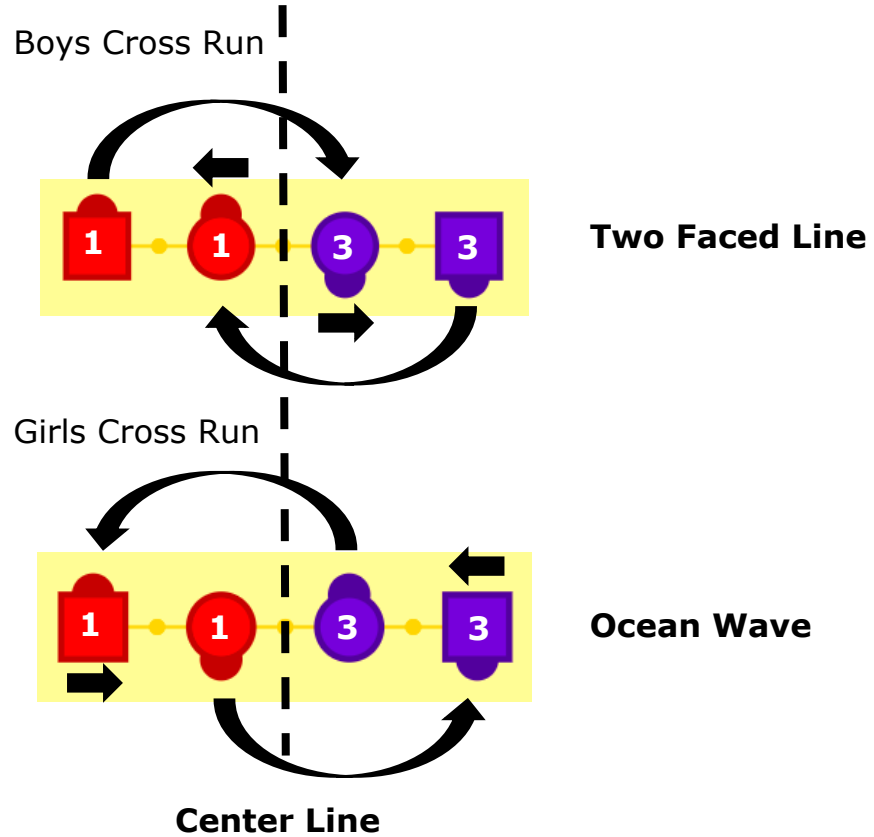

Trade By:

From the Trade By Position (see below), the couples in the center Pass Thru. The people facing out have to **Partner Trade** unless they intend to wander off into the distance.

Cross Run:

When you **Cross Run**, you cross the center line. Instead of running into the spot next to you, you run into the spot on the other side of the wave or line. The designated people (Centers, Ends, Boys, Girls) run while the others slide to make room for them. Ends become Centers and Centers become Ends, but on the other side of the line. It may be called from two faced lines or ocean waves.

**FORMATION
Trade By**

Couples in the center are facing one another;
Other couples are facing out
